PROJECTS

Library management(2019)

The Library Management system is a basic C project. Where I can save the name of the student with the date of issue and author of the book. It also provides a facility to allocate no. Of the books that students can issue.

Movie booking website(2018)

I have created a movie ticket booking website for the project work assigned to I had designed it by using html,css

Credit Card Fraud Detection (capstone)

Now a days due to excessive usage of the contactless credit card the fraudulent activities are also increased. The main objective of the project is to show a easy fraud finding way by comparing algorithms of Machine learning

Credit Card Fraud Detection with machine learning is a process of Data investigation by a Data team and development of a model that will provide the best results in revealing and preventiong fraudulent transactions. This process helps in finding the frauds easily by comparing accuracies of the machine learning algorithms.
